

DSS-R-B-PS-N-470-A

New York Independent System Operator Decision Support System

Total Over and Under Generation Delta Between the Economic and Physical Basepoints for all On-Dispatch/Non Regulating Units
(Contributing factors to differences between the Economic and Physical Basepoints are uneconomic Block Loaded GT generation and poorly performing units that result in the need for SCD to re-dispatch otherwise economic units in an equal and opposite manner to secure the system)

Run for Interval Start Date 07/07/2004
