Extraordinary Corrective Action for Energy Limited Resources

Implementation Policy

For units identified as Energy Limited Resources (ELRs), the NYISO will recognize the appropriate megawatt range as an out-of-merit, resource-limited-block of their bid curve. Should such units be dispatched into that range, they will be designated as "out-of-merit: Energy Limited Resource." That dispatch level will not set the LBMP, but will receive the LBMP that would have prevailed had the ELR not been dispatched into the resource-limited-block.
